

KUPELWIESER

## RIESLING „FRITZ“

**Grapes:** Rhine Riesling

**Origin:** This Rhine Riesling thrives on the fine microclimatic conditions and on the loose, well-aerated soils in the valley floor around Cortina s.s.d.v. Tender care of the vineyard offers the best conditions for an optimal production of this varietal.

**Yield per hectare:** 55 hl.

**Vinification:** The grapes are pressed and the stems are removed in the pneumatic tank press. Before being pressed, a 6 - 8 hour long cold maceration takes place in order to enhance the fruitiness of the wine. Afterwards, the grapes are gently pressed and clarified through the natural settling of sediments. The alcoholic fermentation is carried out with pure strains of yeast at a controlled temperature of 19° C (66° F).

**Characteristic properties:** An elegant white wine, characterized by interesting flavors with fine fruitiness.

**Color:** greenish-yellow to bright yellow

**Bouquet:** softly flowery with scents of fresh peaches

**Flavor:** elegant, dry, tempting, with a delicate and enticing acidity and a lively fullness.

**Recommended pairings:** Fish dishes, vegetables, and the whole range of appetizers

**Serving temperature:** 12 - 14° C (54 - 57° F)

**Cellaring:** 3 - 4 years
